Offc: The AI Decision Intelligence OS

The blueprint for making invisible business risks visible before they happen.

Gemini Notebook

The SME Decision Blindspot

High-stakes choices rely on scattered intelligence.

Gemini Notebook

Introducing the Extra Brain

Offc transforms scattered data into continuous decision intelligence.

Gemini Notebook

The Antidote Protocol

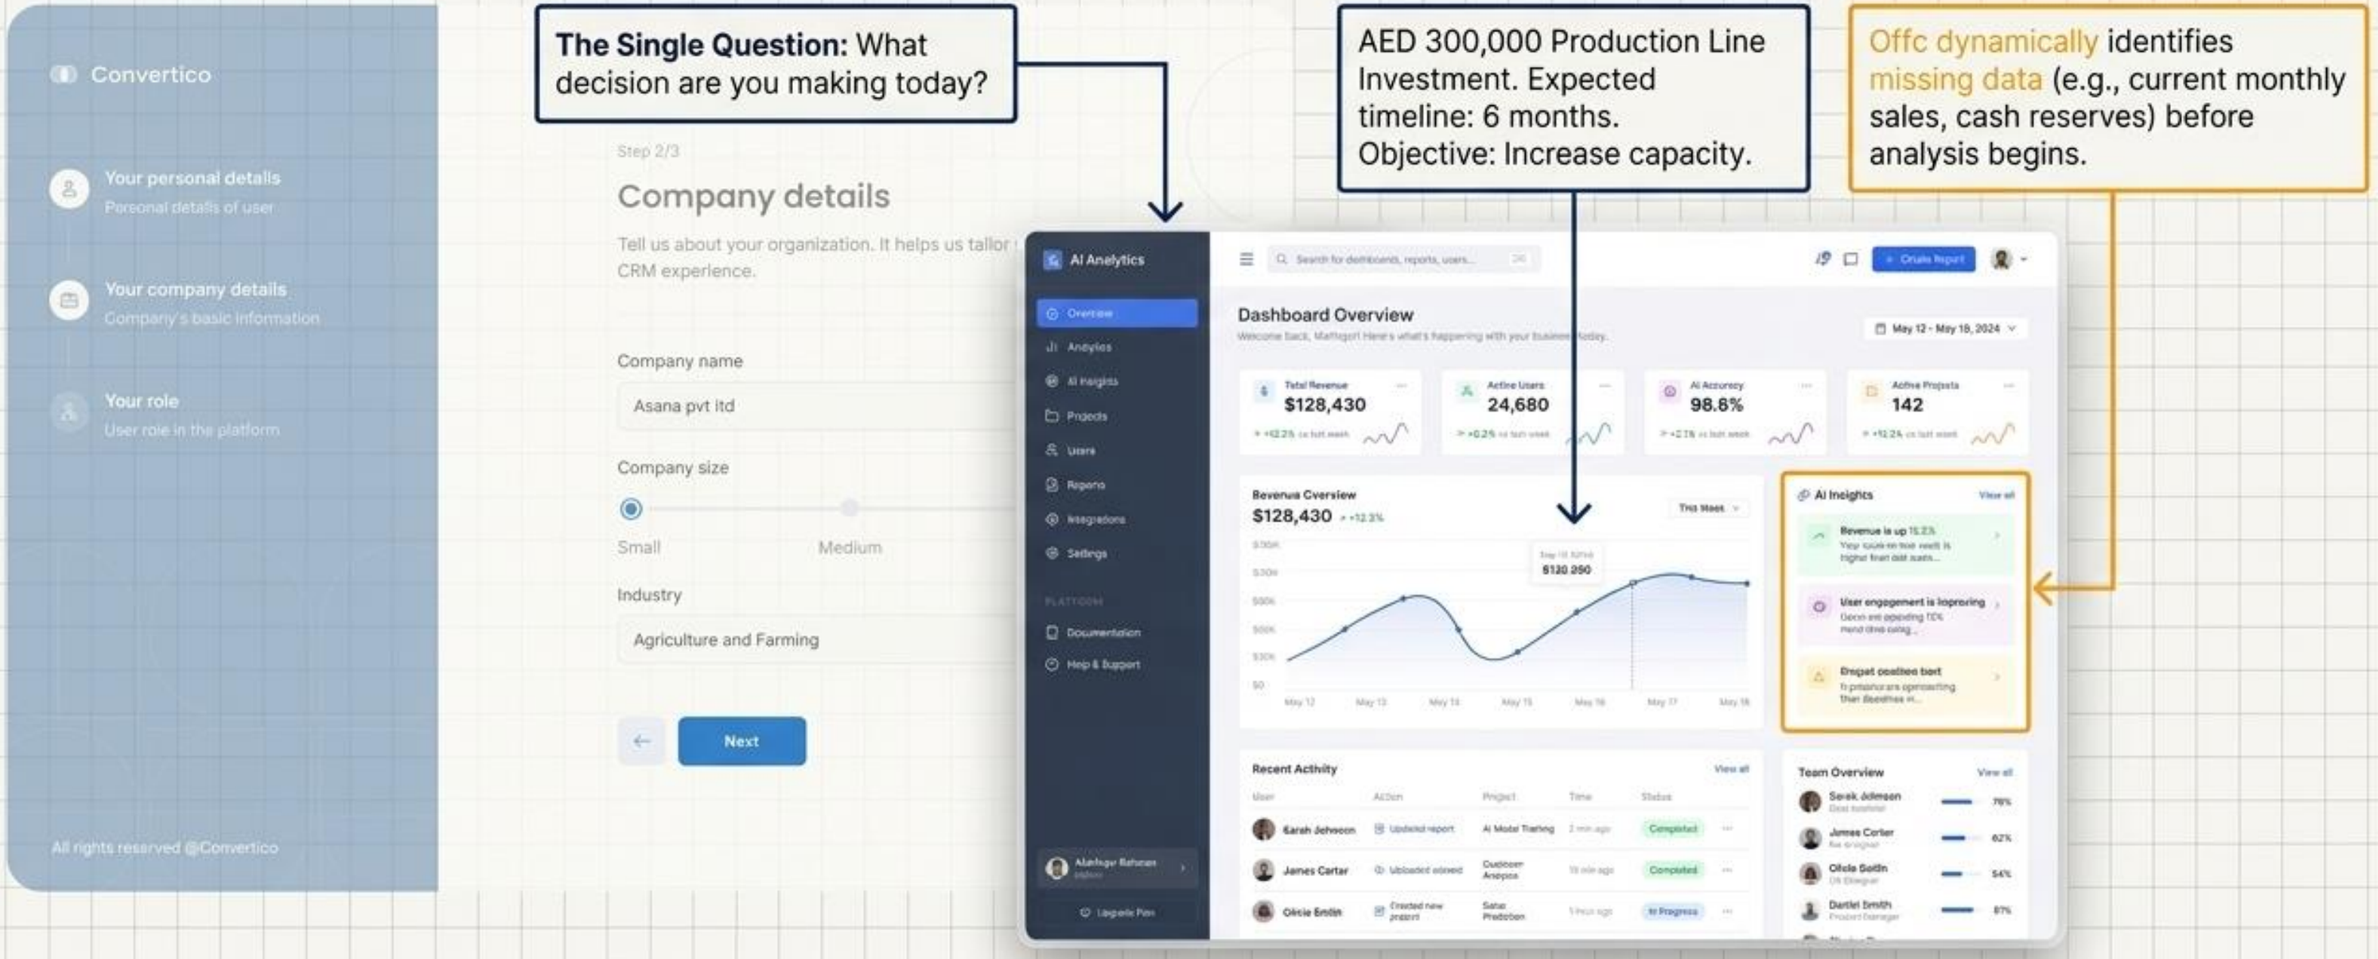

The seven-stage lifecycle of an Offc analysis.

Gemini Notebook

Phase 1: The Context Workspace

Frictionless intake grounded in real company data.

Gemini Notebook

The Signature Feature: The Pre-Mortem

We don’t answer questions. We reverse-engineer future failures.

The Chatbot Approach

Question:
Should I invest AED 300k?

Generic List:
Here are 5 general business risks.

The Pre-Mortem Engine

Present Day Risks

- **1. Demand Drop**
  (Purchased capacity without confirmed orders).
- **2. Cash Squeeze**
  (Insufficient reserves for wages).
- **3. Installation Delay**
  (Supplier bottlenecks).

Future State:
Fast forward 6 months.
The AED 300k is gone.
Costs are up. Cash is tight.

Grounded purely in verified company evidence, not AI hallucinations.

Gemini Notebook

Phase 2: Simulation & Antidotes

Linking mathematical scenarios to assigned human actions.

Scenario Simulator

1. **Revenue Assumption** 100% (AED 80,000)

2. **Operating Costs** 150% (AED 50,000)

3. **Installation Delay** 3 months

Calculated Output:
Simple payback: 10.0 months.

The Action Plan

Risk: Cash becomes tight.
Antidote: Establish minimum cash reserve.
Owner: CFO | Deadline: Oct 12

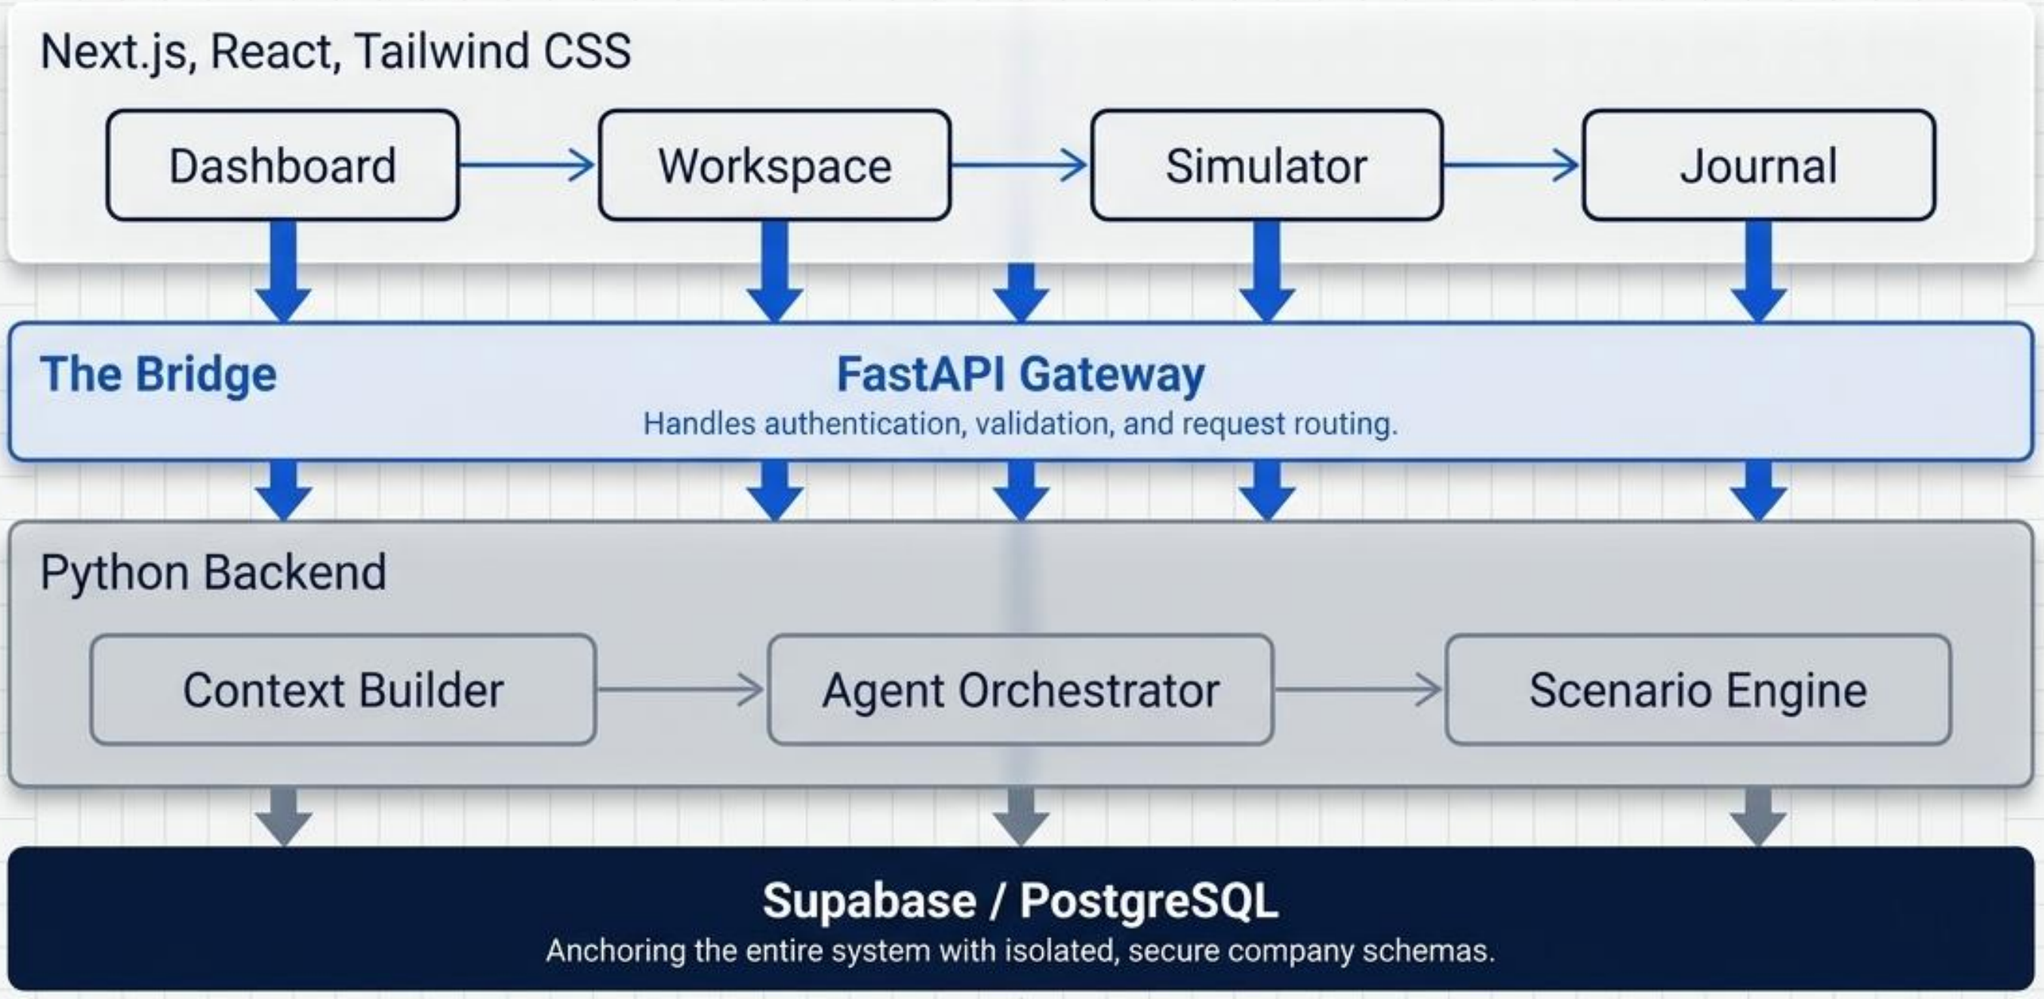

Risk: Demand uncertain.
Antidote: Validate 3 customer commitments.
Owner: Sales Head | Deadline: Oct 15

Risk: Installation delayed.
Antidote: Secure backup supplier for critical components.
Owner: Operations Manager | Deadline: Oct 20

Gemini Notebook

The Perfect Build: System Architecture

Two synchronized flows. One seamless experience.

Gemini Notebook

The AI Board of Directors

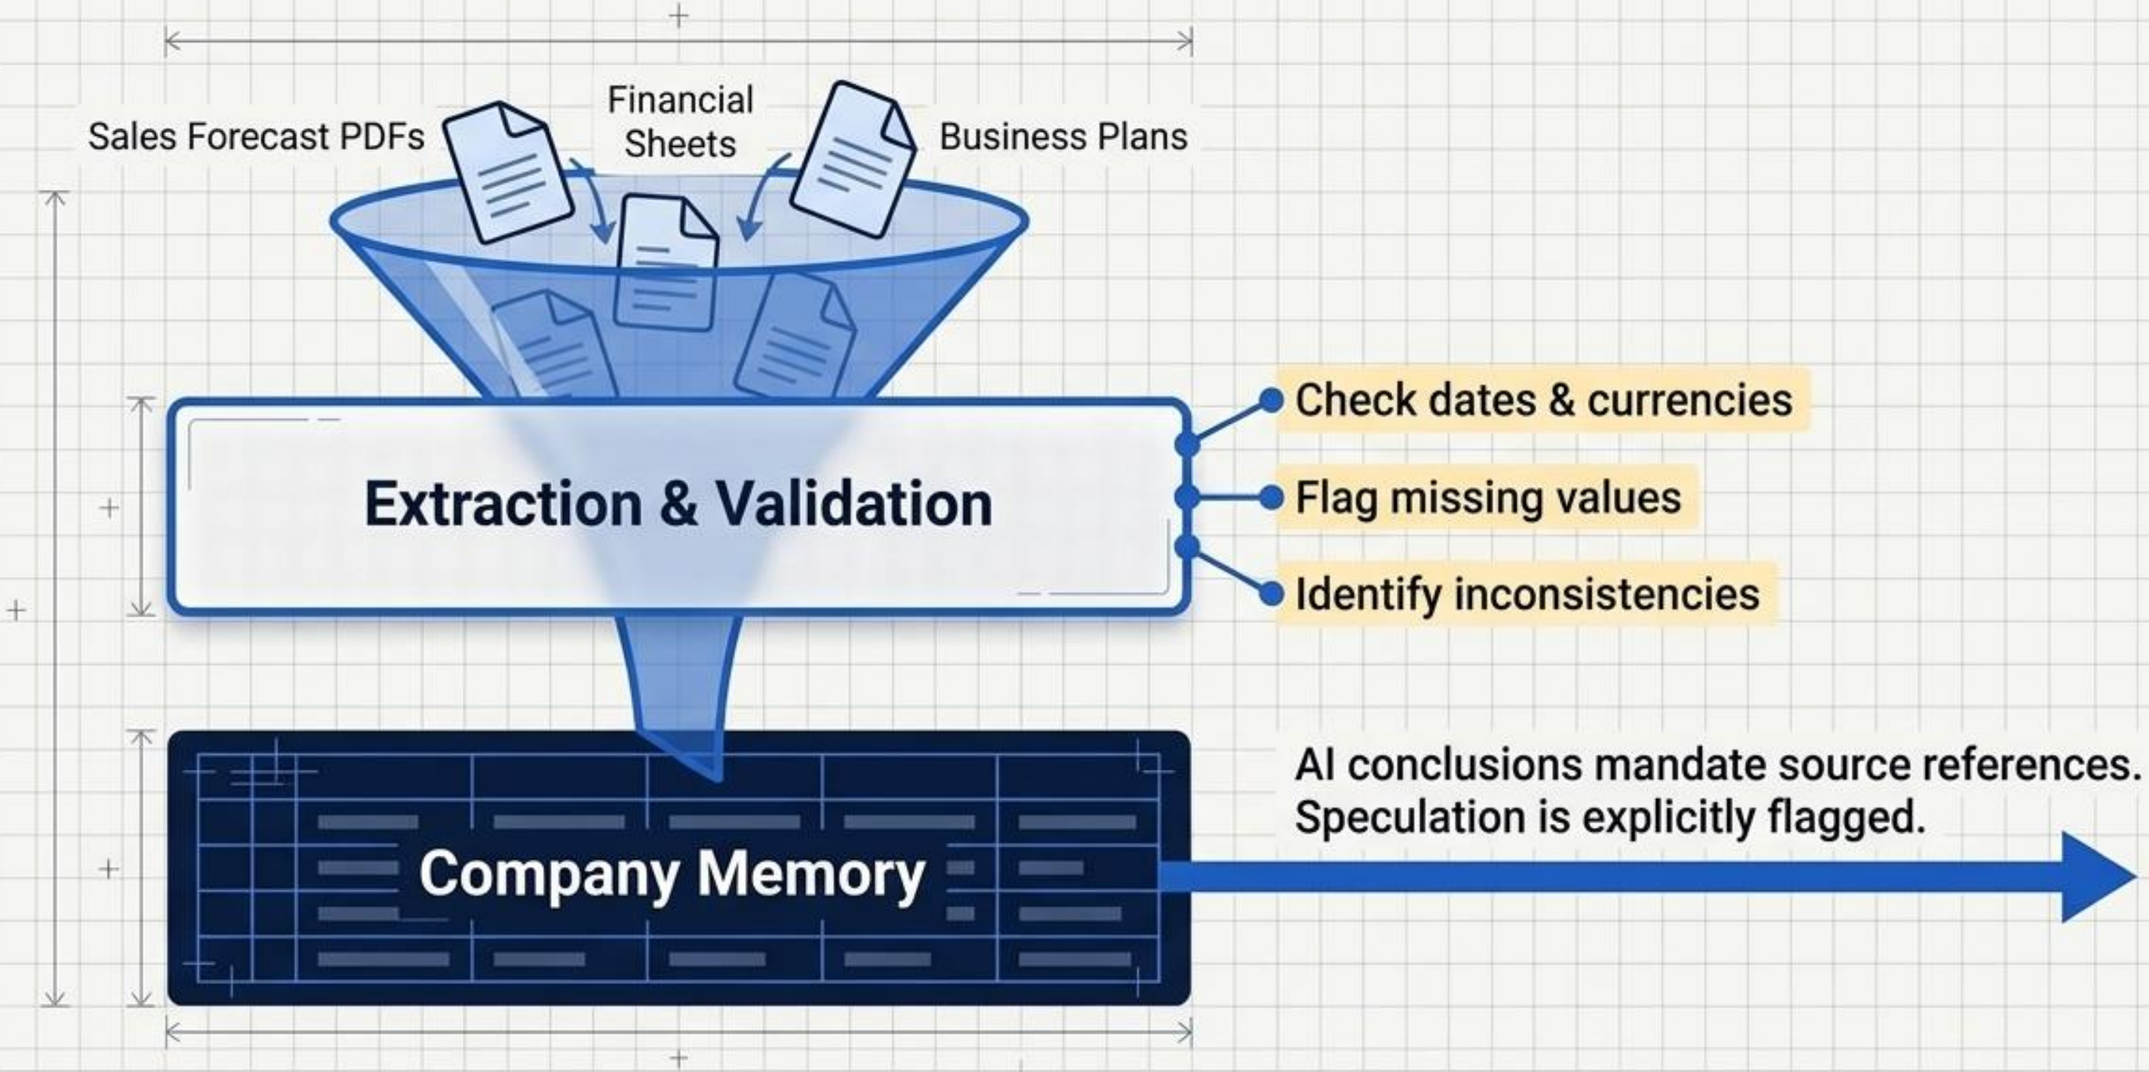

Orchestrated specialist reasoning, synthesized for the user.

Gemini Notebook

RAG & Structured Company Memory

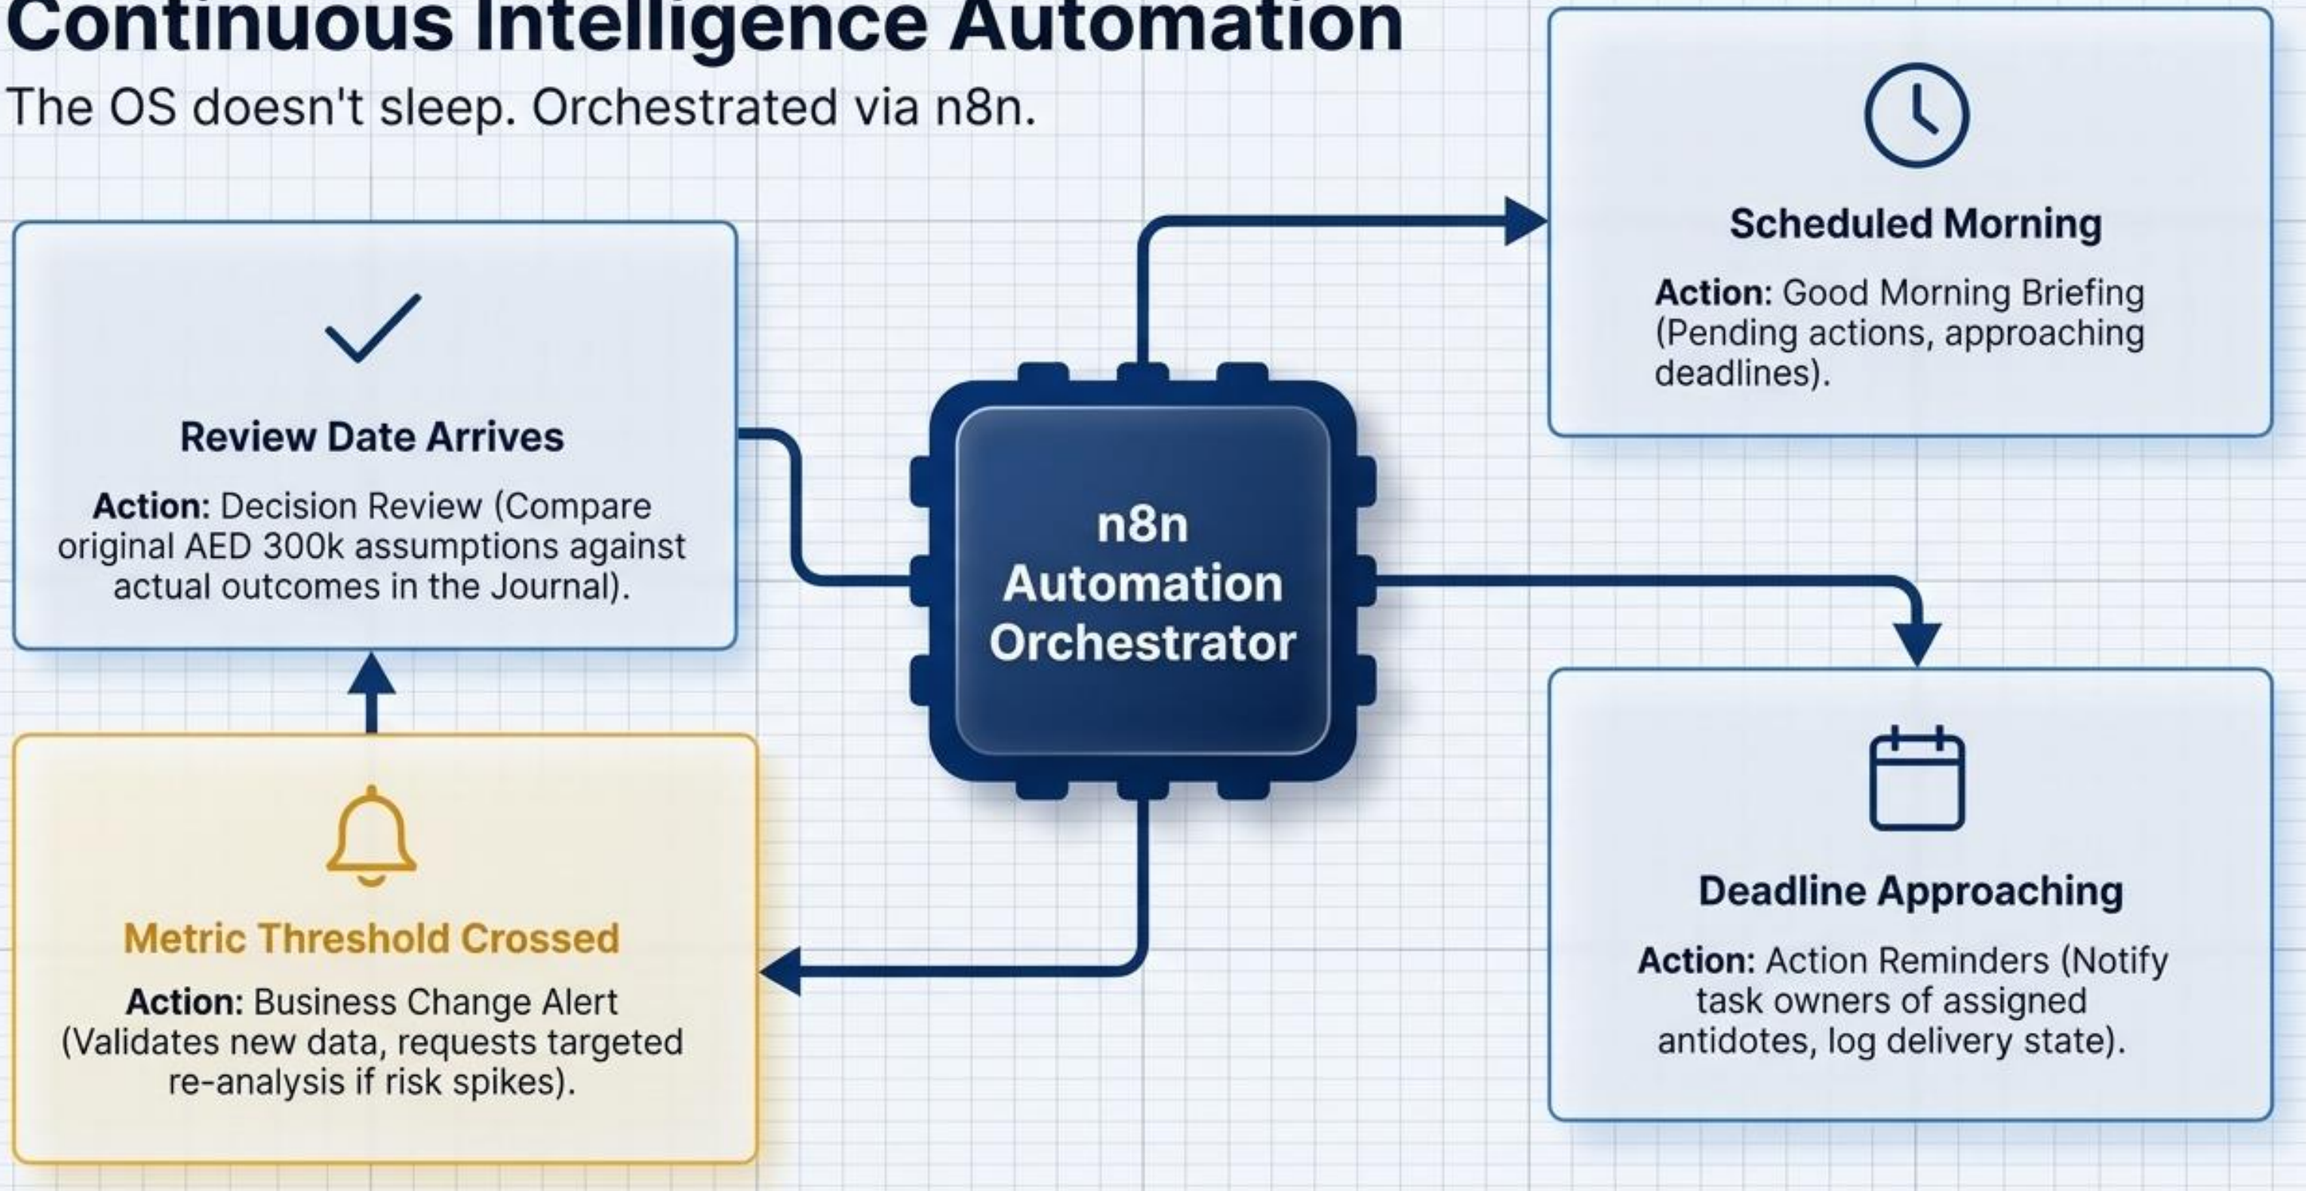

Defending against hallucinations using verified ground truth.

Gemini Notebook

Continuous Intelligence Automation

The OS doesn't sleep. Orchestrated via n8n.

Gemini Notebook

Failure Handling & Reality Checks

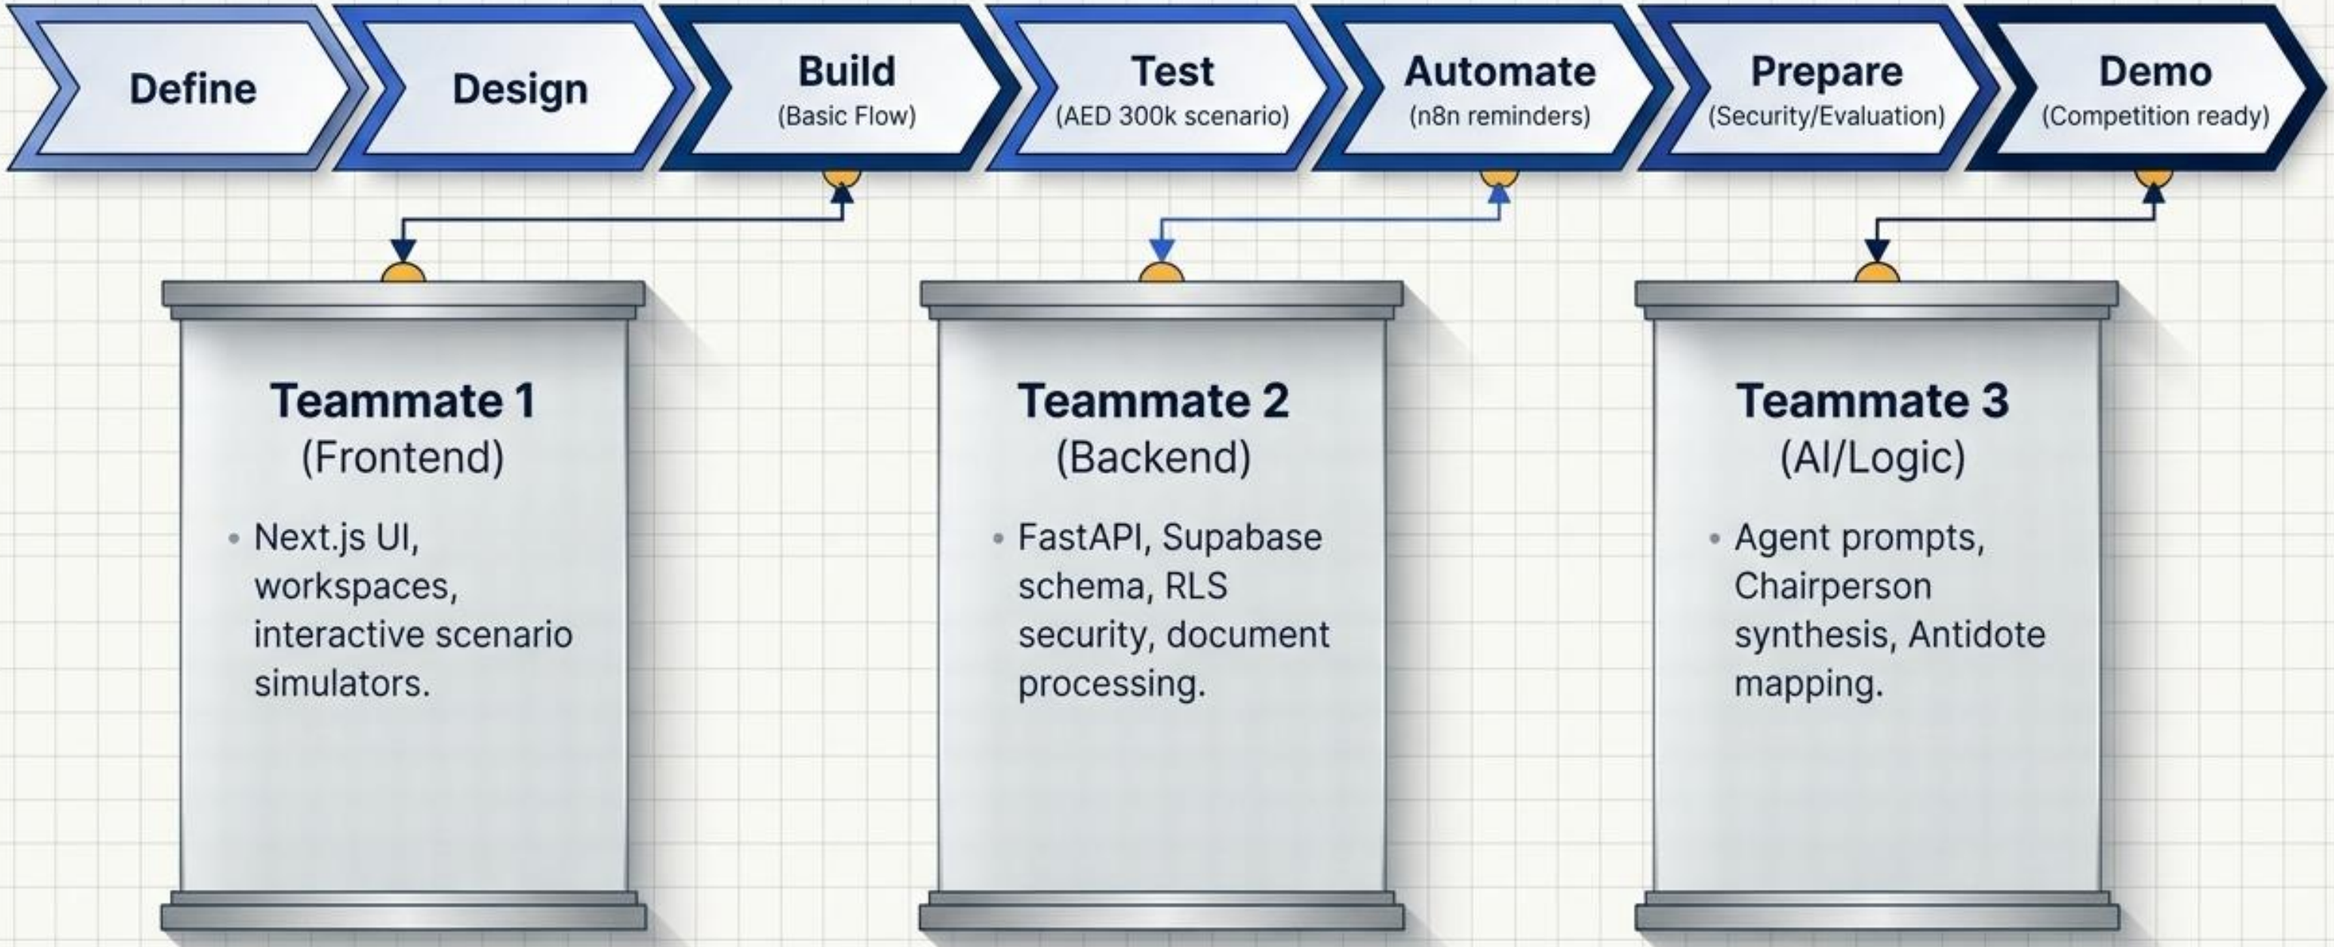

Built for the realities of unpredictable business data.

The Reality (Problem)	The Offc System Response
AI Provider Times Out	Safely retries within limits; preserves analysis state for user resume.
AI Returns Invalid Output	Backend validates schema; rejects/retries rather than silently accepting malformed data.
Required Company Data Missing	Pauses execution; formulates targeted follow-up question to the user.
Two Sources Contradict	Chairperson AI highlights the conflict and source dates; expliciitly refuses to quietly choose one.
Scenario Inputs are Invalid	Scenario Engine blocks calculation; pinpoints exactly which values require correction.

Gemini Notebook

The Implementation Strategy

A realistic roadmap dividing ownership across the stack.

Gemini Notebook

Deployment Matrix: MVP vs. Vision

Expanding functionality only when evidence supports it.

MVP Essentials

- Secure workspace & tenant isolation (RLS).
- Core agent triad (Analyst, Challenger, Chairperson).
- Evidence-backed Pre-Mortem failure scenarios.
- Simple, deterministic scenario calculations.
- One reliable reminder automation (n8n).

Future Scale

- Complex predictive AI forecasting models.
- Full 7-agent specialist deployment.
- Continuous multi-source live data monitoring.
- Automatic external actions / financial triggers.
- Enterprise-scale company-wide analytics.

Gemini Notebook

The Ultimate Blueprint for SME Success

Better decisions. Fewer preventable failures. Continuous learning.

Offc doesn't predict every failure. It ensures you never walk into a predictable one blindly.
